PROJECTS

EnviroPact — *Company Search Engine*

A pact to improve our environment, economy, and society by holding businesses, corporations, and governments accountable for their actions and damages. Our mission and goal at EnviroPact is to make information and data more accessible and transparent to the public so that together we can work towards creating a world with values.

Repository: https://github.com/Justinean/EnviroPact

Manage Me Now — *Project Management App*

A project and employee handle. Managers can create projects and tasks and assign those to employees. Employees can not change anything but they can change their profile pictures and view company projects and their own projects.

Repository: https://github.com/Justinean/Manage-Me-Now

BlitzandChaos — *Interactive Story*

An interactive story where the main character - YOU, the user - will embark on a mission to save the world from a DRAGON! The user will read a story and make decisions, which will determine the final outcome. In the end, you will either find a way to save everyone (including yourself) or be forced to watch everything burn in an unstoppable, fiery apocalypse. The choice is yours. Choose wisely.

Weather Dashboard — *Weather App*

A weather dashboard that you can search for the weather using the postal code and the country of the location you want the weather of. It stores previously searched locations so the user can just click on a button to display the weather of that location again. The user can also clear the previously searched locations. The app displays the current weather, and a five day forecast, which tell you the temperature, weather conditions, wind, humidity, and the UV index.
